Establishing his reputation as a purveyor of luxury by designing high-quality furniture for New York's moneyed elite, Phyfe would come to count among his clients some of the nation's wealthiest and most storied families. More

than sixty works by Phyfe and his workshop are highlighted, including rarely seen pieces from private collections and several newly discovered documented works. Additionally, essays by leading scholars bring to light new information on Phyfe's life, his workshop production, and his roster of illustrious patrons. **Lowrider Coloring Book** Oscar Nilsson 2011-04-14 Paint your own lowrider just the way you like it! Impalas, Cadillacs and Rivas. In the Lowrider Coloring Book, you will color the classic and most popular Lowrider models. Lowrider culture reaches back to 1930s Los Angeles, where it became popular for style-conscious Latino-Americans to load their cars with sandbags to bring it closer to the road. Style was everything, and when lowered cars were banned in California in the 1950s, it became necessary to find a way to raise and lower the car simply to avoid fines. The solution was to use hydraulics from old fighter planes left over from World War II. The rapper Kid Frost showcased lowriding in the early 90s hit Lowrider, and since then, the cars are closely associated with hip hop culture. Today, lowriding is bigger than ever with thousands of enthusiasts in most parts of the world. All strive to outdo each other with the most elegant varnish, interior, hydraulics, chrome and rims. The custom cars you'll be coloring in the Lowrider Coloring book were converted by some of the best and most legendary enthusiasts. What color is your Impala?

**The Road to Ruin** Niki Savva 2017-08-02 'There will be no wrecking, no undermining, and no sniping.' -Tony Abbott, 15 September 2015 Abbott's performances in the party-room debates on education and climate change had ranged between woeful and pathetic. He sounded desperate, he was inconsistent, and -- his colleagues thought -- slightly ridiculous. They knew he would never stop going after cheap headlines during soft interviews where he sucked up the oxygen, with revision and division as his calling cards. All they could hope was that people would soon grow tired of listening to him. Normal people might have, but the media grew more and more hysterical, as if a challenge were imminent. In the original edition of The Road to Ruin, prominent political commentator, author, and columnist for The Australian Niki Savva revealed the ruinous behaviour of former prime minister Tony Abbott and his chief of staff, Peta Credlin. Based on her unrivalled access to their colleagues, and devastating first-person accounts of what went on behind the scenes, Savva painted an unforgettable picture of a unique duo who wielded power ruthlessly but not well. That edition became a major bestseller, and went on to win an

Australian book industry award for the best general non-fiction book of the year. Now Savva continues where she left off. This updated edition contains a new, 13,500-word final chapter, in which Savva reveals the inner state of the Turnbull government -- and the behind-the-scenes jockeying of friends and foes alike. From Christopher Pyne's career-stalling own goal, to Peter Dutton's post-Turnbull leadership ambitions, to Tony Abbott's ramped-up destabilisation campaign, it is, as usual, an unputdownable and impeccably sourced account.

**Transpacific Studies** Janet Alison Hoskins 2014-08-31 The Pacific has long been a space of conquest, exploration, fantasy, and resistance. Pacific Islanders had established civilizations and cultures of travel well before European explorers arrived, initiating centuries of upheaval and transformation. The twentieth century, with its various wars fought in and over the Pacific, is only the most recent era to witness military strife and economic competition. While "Asia Pacific" and "Pacific Rim" were late twentieth-century terms that dealt with the importance of the Pacific to the economic, political, and cultural arrangements that span Asia and the Americas, a new term has arisen—the transpacific. In the twenty-first century, U.S. efforts to dominate the ocean are symbolized not only in the "Pacific pivot" of American policy but also the development of a Transpacific Partnership. This partnership brings together a dozen countries—not including China—in a trade pact whose aim is to cement U.S. influence. That pact signals how the transpacific, up to now an academic term, has reached mass consciousness. Recognizing the increasing importance of the transpacific as a word and concept, this anthology proposes a framework for transpacific studies that examines the flows of culture, capital, ideas, and labor across the Pacific. These flows involve Asia, the Americas, and the Pacific Islands. The introduction to the anthology by its editors, Janet Hoskins and Viet Thanh Nguyen, consider the advantages and limitations of models found in Asian studies, American studies, and Asian American studies for dealing with these

flows. The editors argue that transpacific studies can draw from all three in order to provide a critical model for considering the geopolitical struggle over the Pacific, with its attendant possibilities for inequality and exploitation. Transpacific studies also sheds light on the cultural and political movements, artistic works, and ideas that have arisen to contest state, corporate, and military ambitions. In sum, the transpacific as a concept illuminates how flows across the Pacific can be harnessed for purposes of both domination and resistance. The anthology's contributors include geographers (Brenda S. A. Yeoh, Weiqiang Lin), sociologists (Yen Le Espiritu, Hung Cam Thai), literary critics (John Carlos Rowe, J. Francisco Benitez, Yunte Huang, Viet Thanh Nguyen), and anthropologists (Xiang Biao, Heonik Kwon, Nancy Lutkehaus, Janet Hoskins), as well as a historian (Laurie J. Sears), and a film scholar (Akira Lippit). Together these contributors demonstrate how a transpacific model can be deployed across multiple disciplines and from varied locations, with scholars working from the United States, Singapore, Japan and England. Topics include the Cold War, the Chinese state, U.S. imperialism, diasporic and refugee cultures and economies, national cinemas, transpacific art, and the view of the transpacific from Asia. These varied topics are a result of the anthology's purpose in bringing scholars into conversation and illuminating how location influences the perception of the transpacific. But regardless of the individual view, what the essays gathered here collectively demonstrate is the energy, excitement, and insight that can be generated from within a transpacific framework.

**Classic Greenwich Houses** Charles F. Hilton 2020-09-15 Elegant and welcoming houses in bucolic settings by Charles Hilton, a leading traditional architect in Greenwich. This book presents nine spectacular houses, each responding to an equally spectacular site. They are the work of Charles Hilton, a leading traditional architect in Greenwich, Connecticut, whose firm has been honored with multiple regional and national awards including Palladio and Stanford White awards. As an architect, Hilton is committed to designing imaginative buildings that inspire and delight and to creating a humanistic architecture that embodies the aspirations of his clients. He works in traditional vocabularies--principally Georgian, Beaux-Arts and shingle style--with exquisite classical detailing, but his houses are also completely contemporary in incorporating state-of-the-art technology and sustainable design. As he observes, "Our clients rely on our creativity and ingenuity to create houses that honor tradition, while seamlessly integrating modern amenities essential for contemporary living." Hilton has practiced in Greenwich for more than thirty years, and he is completely fluent with its rich and diverse architectural heritage. This means that his houses, while meticulously detailed and impressive, are also beautifully integrated into the panoramic waterfronts, rolling lawns and rustic back-country landscapes that are characteristic of Greenwich and the surrounding countryside.

*Rockin' in Time* David P. Szatmary 1991 A concise yet comprehensive account of the origins and evolution of rock music, emphasizing its interaction with social change and cultural trends. The narrative begins with "the birth of the blues" and proceeds to discuss the major (and

Using a lively, anecdotal approach and pertinent quotes, the author examines the appropriate political, economic, technological, or psychological context of each topic, e.g., the relationship between Dylan's music and JFK's New Frontier. A primary focus throughout is on the contributions of blacks and the role of racism. Paul Feehan, Univ. of Miami Lib., Coral Gables, Fla. - Library Journal.

**Dark Towers** David Enrich 2020-02-18 #1 WALL STREET JOURNAL BESTSELLER \* NEW YORK TIMES BESTSELLER New York Times finance editor David Enrich's explosive exposé of the most scandalous bank in the world, revealing its shadowy ties to Donald Trump, Putin's Russia, and Nazi Germany "A jaw-dropping financial thriller" —Philadelphia Inquirer On a rainy Sunday in 2014, a senior executive at Deutsche Bank was found hanging in his London apartment. Bill Broeksmit had helped build the 150-year-old financial institution into a global colossus, and his sudden death was a mystery, made more so by the bank's efforts to deter investigation. Broeksmit, it turned out, was a man who knew too much. In *Dark Towers*, award-winning journalist David Enrich reveals the truth about Deutsche Bank and its epic path of devastation. Tracing the bank's history back to its propping up of a default-prone American developer in the 1880s, helping the Nazis build Auschwitz, and wooing Eastern Bloc authoritarians, he shows how in the 1990s, via a succession of hard-charging executives, Deutsche made a fateful decision to pursue Wall Street riches, often at the expense of ethics and the law. Soon, the bank was manipulating markets, violating international sanctions to aid terrorist regimes, scamming investors, defrauding regulators, and laundering money for Russian oligarchs. Ever desperate for an American foothold, Deutsche also started doing business with a self-promoting real estate magnate nearly every other bank in the world deemed too dangerous to touch: Donald Trump. Over the next twenty years, Deutsche executives loaned billions to Trump, the Kushner family, and an array of scandal-tarred clients, including convicted sex offender Jeffrey Epstein.

Dark Towers is the never-before-told saga of how Deutsche Bank became the global face of financial recklessness and criminality—the corporate equivalent of a weapon of mass destruction. It is also the story of a man who was consumed by fear of what he'd seen at the bank—and his son's obsessive search for the secrets he kept.

**Laser Science and Technology** A.N. Chester 2012-12-06 The conference "Laser Science and Technology" was held May 11-19, 1987 in Erice, Sicily. This was the 12th conference organized by the International School of Quantum Electronics, under the auspices of the "Ettore Majorana" Center for Scientific Culture. This volume contains both the invited and contributed papers presented at the conference, covering current research work in two areas: new laser sources, and laser applications. The operation of the first laser by Dr. Theodore Maiman in

1960 initiated a decade of scientific exploration of new laser sources. This was followed by the decade of the 1970s, which was characterized by "technology push" in which the discoveries of the 1960s were seeking practical application. In the 1980s we are instead seeking "applications pull," in which the success and rapid maturing of laser applications provides both inspiration and financial resources to stimulate additional work both on laser sources and applications. The papers presented in these Proceedings attest to the great vitality of research in both these areas: New Laser Sources. The papers describe current developments in ultra violet excimer lasers, X-ray lasers, and free electron lasers. These new lasers share several characteristics: each is a potentially important coherent source; each is at a relatively short wavelength (below 1 micrometer); and each is receiving significant development attention today.
